

Optimize your four-stroke operations

Everllence PrimeServ Assist helps you stay ahead by optimizing your equipment, software, and systems. Combining machine data, advanced analytics, and OEM expertise, it enhances daily operations and boosts the efficiency of your four-stroke engines. With perceptive performance insights, it minimizes downtime and maximizes productivity.

Our digital solutions
keep your engine...

Clean

Available

Efficient

Safe

Secure

PrimeServ Assist is a proactive 24/7 service driven by data, AI and Everllence experts. PrimeServ Assist gives you access to the Everllence CEON digital platform, with applications that display the current condition of your assets. You can also access special dashboards to get an even deeper understanding of your four-stroke equipment's operation.

Operational intelligence and asset optimization

- AI-driven performance
- Improved vessel operation
- Condition monitoring

Everllence

PrimeServ Assist

To make the right decisions, you need the right data to be collected and then intelligently processed. Developed by the same people who designed your equipment, PrimeServ Assist gives you the operational insights and advice you need to optimize performance and decarbonize operations. PrimeServ Assist helps you maximize your availability, efficiency, and safety, generating immediate results that enhance profitability.

Access in-depth OEM expertise

A dedicated team of Everllence PrimeServ experts is continuously monitoring your equipment, ensuring optimal performance at all times.

With over 1,000 Everllence engines connected, we have the expertise to know exactly where to look. Our in-depth knowledge allows us to quickly identify the root cause of any anomalies and provide effective solutions. Should any issues arise, you can rely on immediate support from our team. Additionally, our advanced algorithms are constantly learning, improving their ability to rapidly detect and address challenges.

Our digital backbone: Everllence CEON

Everllence CEON is the platform solution behind all our digital products. It enables holistic data aggregation for real-time monitoring and data insights with the highest security standard. The result: increased data value, leading to optimal availability and efficiency.

- Get 24/7 access to all operational engine data, engine alerts, and expert messages
- Create charts and dashboards based on your needs
- Proactively contact our experts via a convenient messaging app
- Access on multiple devices and monthly reports
