

PrimeServ Omnicare

Omnicare Your One-Stop Service for Turbomachinery

Everllence

Meet PrimeServ Omnicare

Your single trusted partner for comprehensive turbomachinery solutions across all brands.

Operating a mixed fleet of turbines, compressors, and expanders from multiple OEMs often leads to operational complexity and reduced efficiency. Varying contract terms, inconsistent service standards, and multiple points of contact can drive up costs and increase the risk of unplanned downtime.

PrimeServ Omnicare simplifies this by combining OEM-quality service with strong local execution, all covered by a single comprehensive agreement. You benefit from consistent service delivery, faster response times, and greater visibility into your maintenance landscape – regardless of equipment type or manufacturer.

Our 360-degree service approach supports every stage of your equipment's lifecycle. From inspections and field service to repairs, revamps, modernizations, and digital monitoring, you gain faster execution, coordinated processes, and full transparency. This reduces downtime, improves performance, and extends equipment life – while keeping service efforts and costs under control.

Tailored to your needs

Omnicare offers a modular portfolio shaped around your turbomachinery fleet and priorities. All services are bundled into one agreement that streamlines fleet management and ensures long-term reliability through a single trusted partner.

Field Service

Flexible, expert support covering inspections, troubleshooting, maintenance, and commissioning for all major turbo-machinery equipment.

Repairs

On-site and workshop repairs, overhauls, and component replacements for turbines, compressors, and expanders – delivered close to your operations.

Turnaround Solutions

Full management of scheduled maintenance – from planning through execution – ensuring efficiency and accountability.

Digital & Service Agreements

Advanced condition monitoring and predictive maintenance integrated into customized contracts for improved reliability and cost control.

Revamps & Footprints

Equipment upgrades and modifications that extend life, enhance performance, and adapt to evolving plant requirements.
