

Spare parts
supply & services by the
original manufacturer

Forever the **only original**

Everllence

PrimeServ

More than just spare parts

For a standard maintenance job you just need spare parts. But when timelines tighten, regulations shift, and pressure builds, you need more. You need experts who understand what your equipment is built to do, because they designed it in the first place.

That's when aftersales service becomes about more than simply supplying parts. It becomes a partnership.

From marine and power to wind and turbo-machinery, Everllence PrimeServ delivers peace of mind with original parts, trained engineers, and digital tools that help put you in control – and keep you there.

Above all, you benefit from a strategic mindset built around your uptime, your emissions goals, your compliance challenges, and your bottom line.

Forever the only original

From MAN to Everllence.

As a full-service, global OEM partner, we've helped move the world forward – powering industries with knowledge, service, and original equipment for over 250 years. Engineering that changes the world for the better. And we plan to keep doing just that.

But sometimes, change itself is what drives progress. And we're now driving progress under a new name – MAN PrimeServ has become Everllence PrimeServ.

Don't worry, we're still as original as ever. We don't ride industry waves – we build the engines that move them.

We don't follow trends – we lead with technology that drives decarbonization. No matter how big the task, we move it to zero.

Our people are at your service 24/7, ensuring that our standards, our purpose, and our values keep solving the challenges others can't. Because we're more than just parts. We're your trusted, solution-driven OEM – pioneering progress all over the world.

A change of name will never change that.

Everllence PrimeServ
Forever the only original

Excellence

runs in our brands

Everllence
PrimeServ

When your equipment carries a name like MAN, Pielstick, or Sulzer, it means something. It means proven engineering. A history of performance. And now, the only name you need to keep it running is Everllence PrimeServ.

Because we're still your OEM. Still the only source for original parts, insight, and support. Still the partner behind the brands that power your world.

Whatever the badge on your machine, the standard behind it hasn't changed. And we're proud to support the legacy you rely on with the precision, passion, and partnership that keep it moving forward.

We are still the only original equipment manufacturer for these brands:

- MAN Energy Solutions
- S.E.M.T. Pielstick
- B&W Motor
- Ruston
- Mirreles Blackstone
- Paxman
- Sulzer Turbo
- Alpha propulsion systems

Moving big things to zero

“

We have the opportunity to decarbonize industries that are crucial to the world economy. That's why we get out of bed every morning.”

– Dr. Uwe Lauber, CEO, Everllence

You're under pressure to reduce emissions. But you're not in it alone. We're here to help you achieve results faster, smarter, and without compromise.

From shipping to power to industrial production, we work with the world's most critical sectors to take on one of the toughest challenges of our time: cutting emissions in industries that can't afford to slow down.

With over 250 years of engineering experience, we're not just keeping up – we're pushing forward. That means radically rethinking the status quo,

including our own portfolio, to bring you future-facing technologies, digital tools, and smarter ways to move ahead.

To reach net zero by 2050, global emissions must be cut by two-thirds this decade. So, this isn't about small improvements. It's about bold shifts, shared responsibility, and lasting impact. And together, we can get there.

Our name has changed. Our mission hasn't: **Moving big things to zero.**

Values

never change

Pioneering spirit

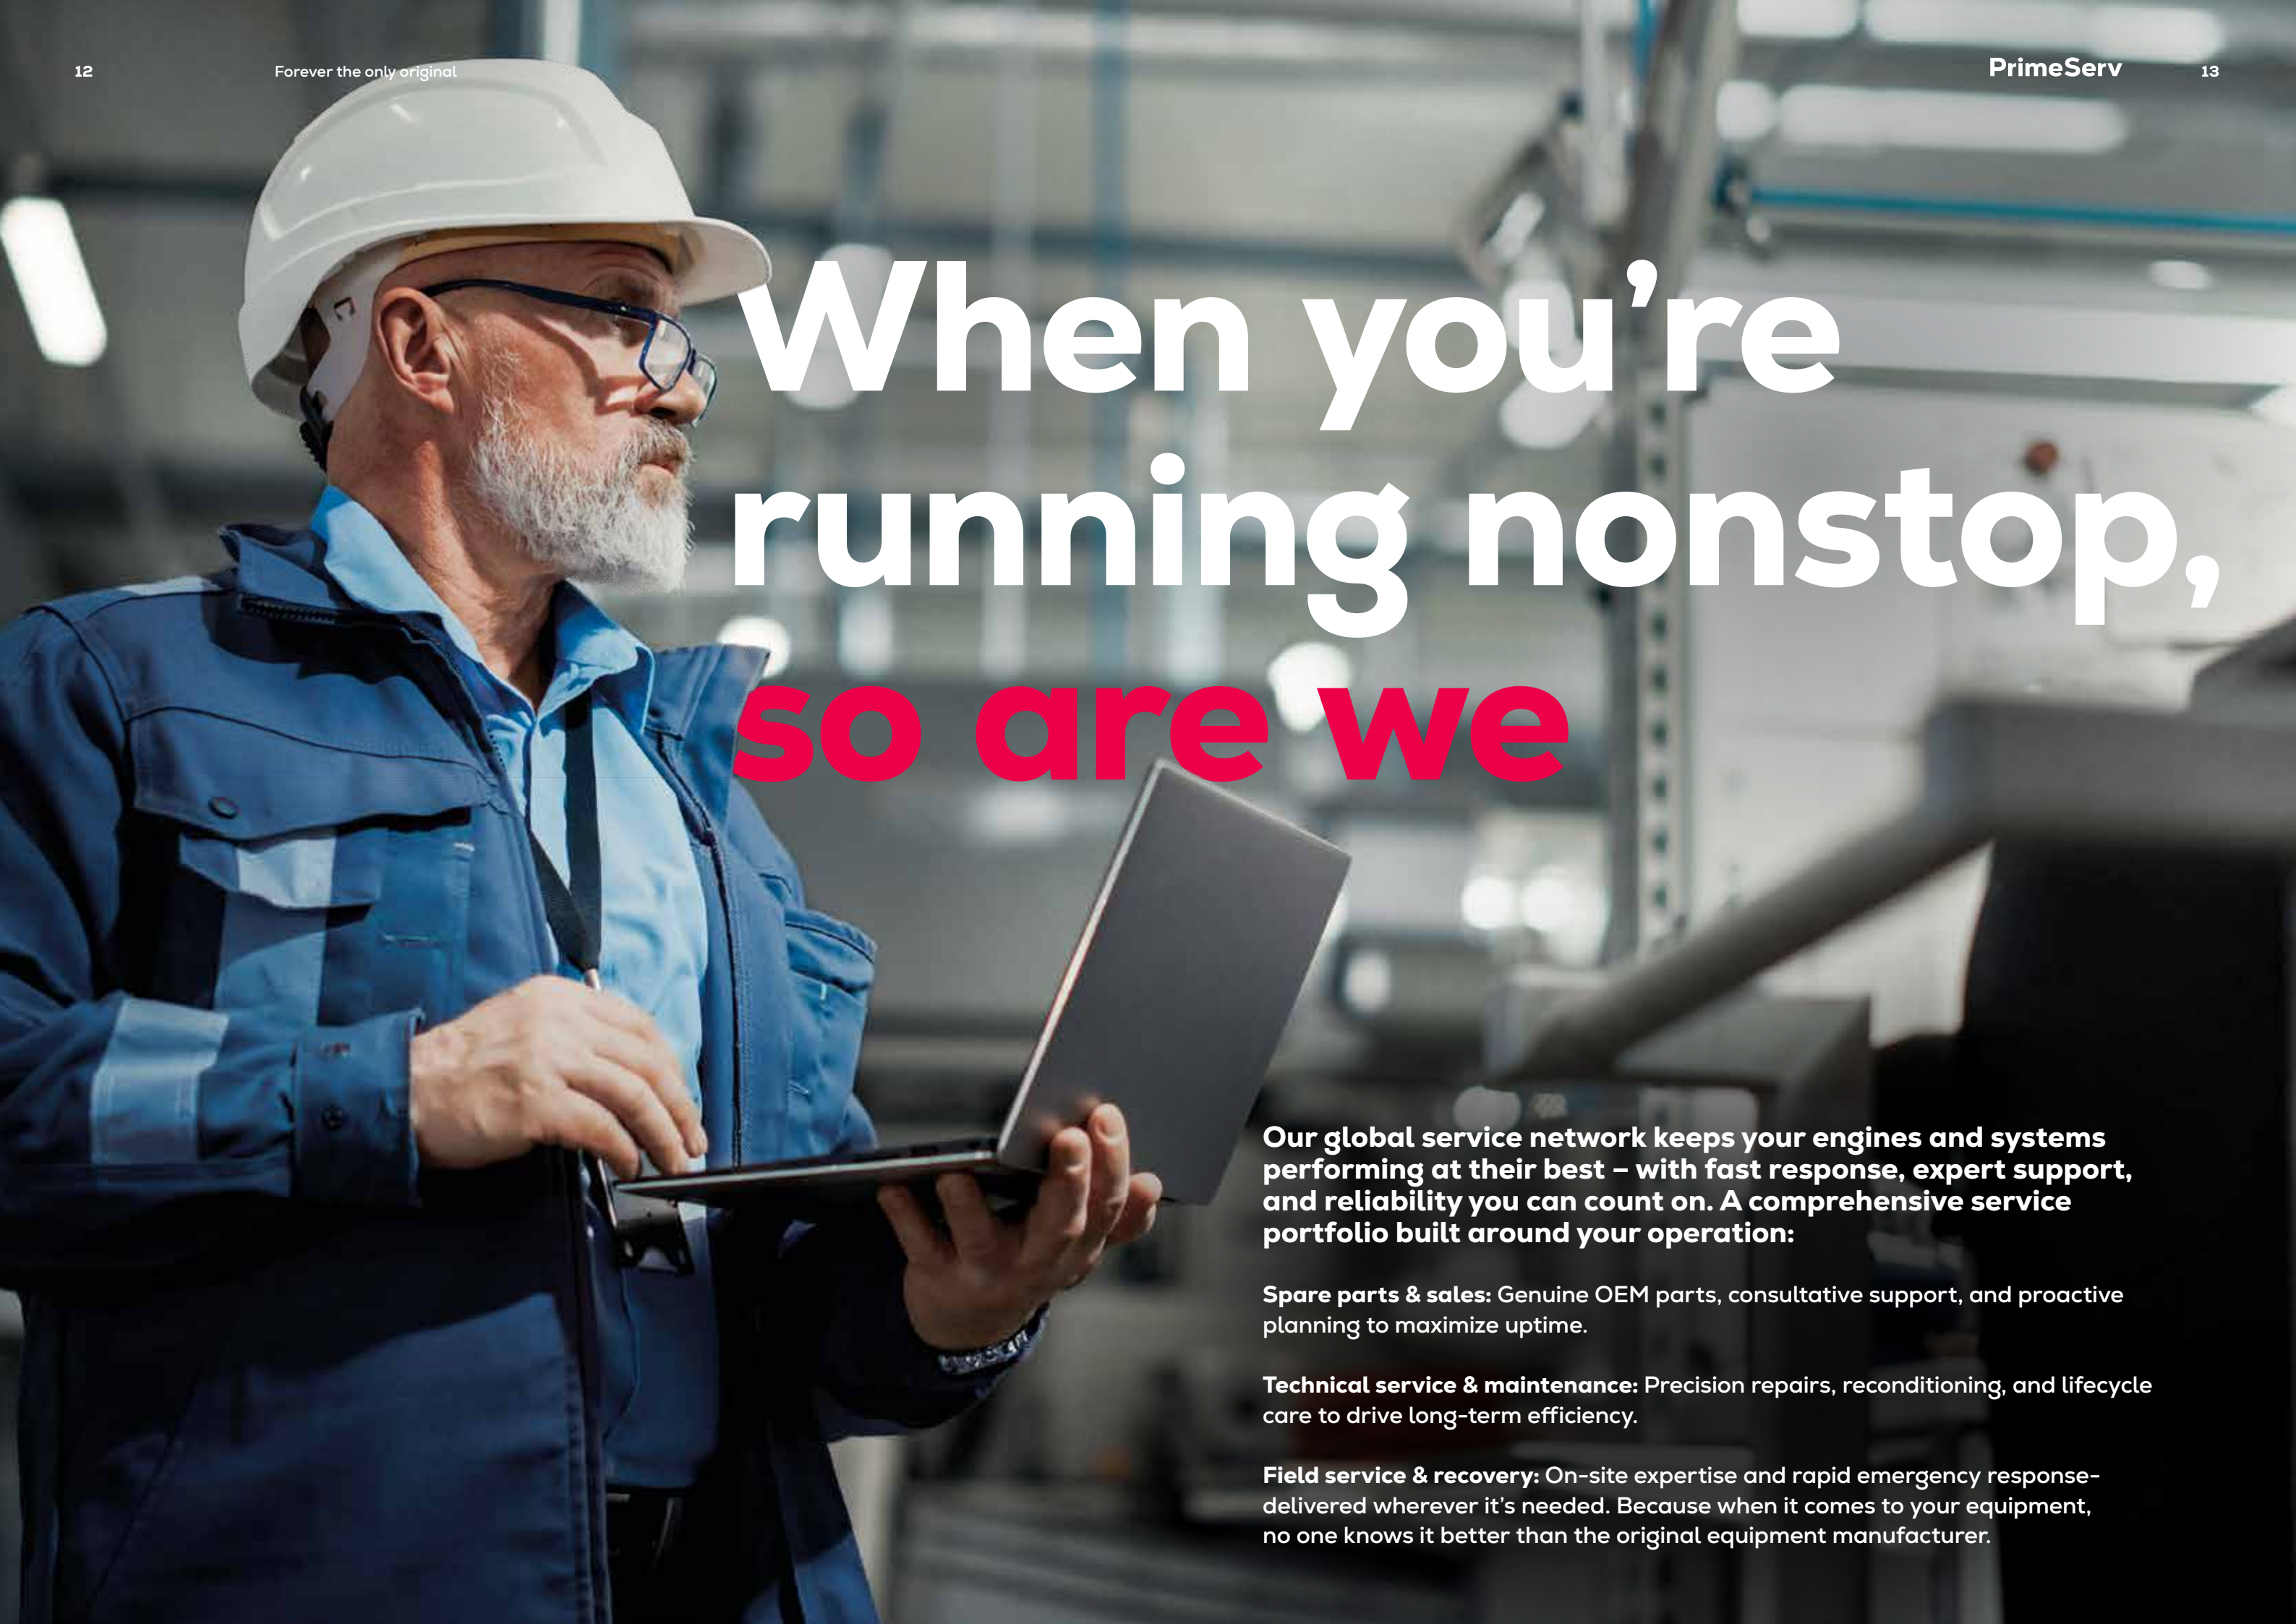

Pushing limits isn't just about where we're going. It's where we're taking you – toward smarter solutions, cleaner power, and next-level performance.

Solution-orientation

When challenges hit, excuses are no good to you, so we lean in. Every fix we make, every insight we share, is shaped not only by our experience – but by your reality.

Reliability

Being original isn't just about being first. It's about being there. Consistently. Dependably. With service that performs when it matters most. We're committed to being your preferred and trusted service partner.

A man with a grey beard and glasses, wearing a white hard hat and a blue work jacket, is holding a laptop. He is looking at the screen. The background is a blurred industrial setting with machinery and pipes.

When you're running nonstop, so are we

Our global service network keeps your engines and systems performing at their best – with fast response, expert support, and reliability you can count on. A comprehensive service portfolio built around your operation:

Spare parts & sales: Genuine OEM parts, consultative support, and proactive planning to maximize uptime.

Technical service & maintenance: Precision repairs, reconditioning, and lifecycle care to drive long-term efficiency.

Field service & recovery: On-site expertise and rapid emergency response—delivered wherever it's needed. Because when it comes to your equipment, no one knows it better than the original equipment manufacturer.

Our service lifecycle for your peace of mind

Keep your operations efficient, compliant, and competitive with genuine OEM parts, strategic upgrades, and digital solutions that move you forward

Future-proof your asset with retrofit & upgrade solutions for compliance and lifecycle extension of your asset

Technical service on demand: leave servicing your critical components to our technical experts

Investing in a new Everllence engine, turbine or component

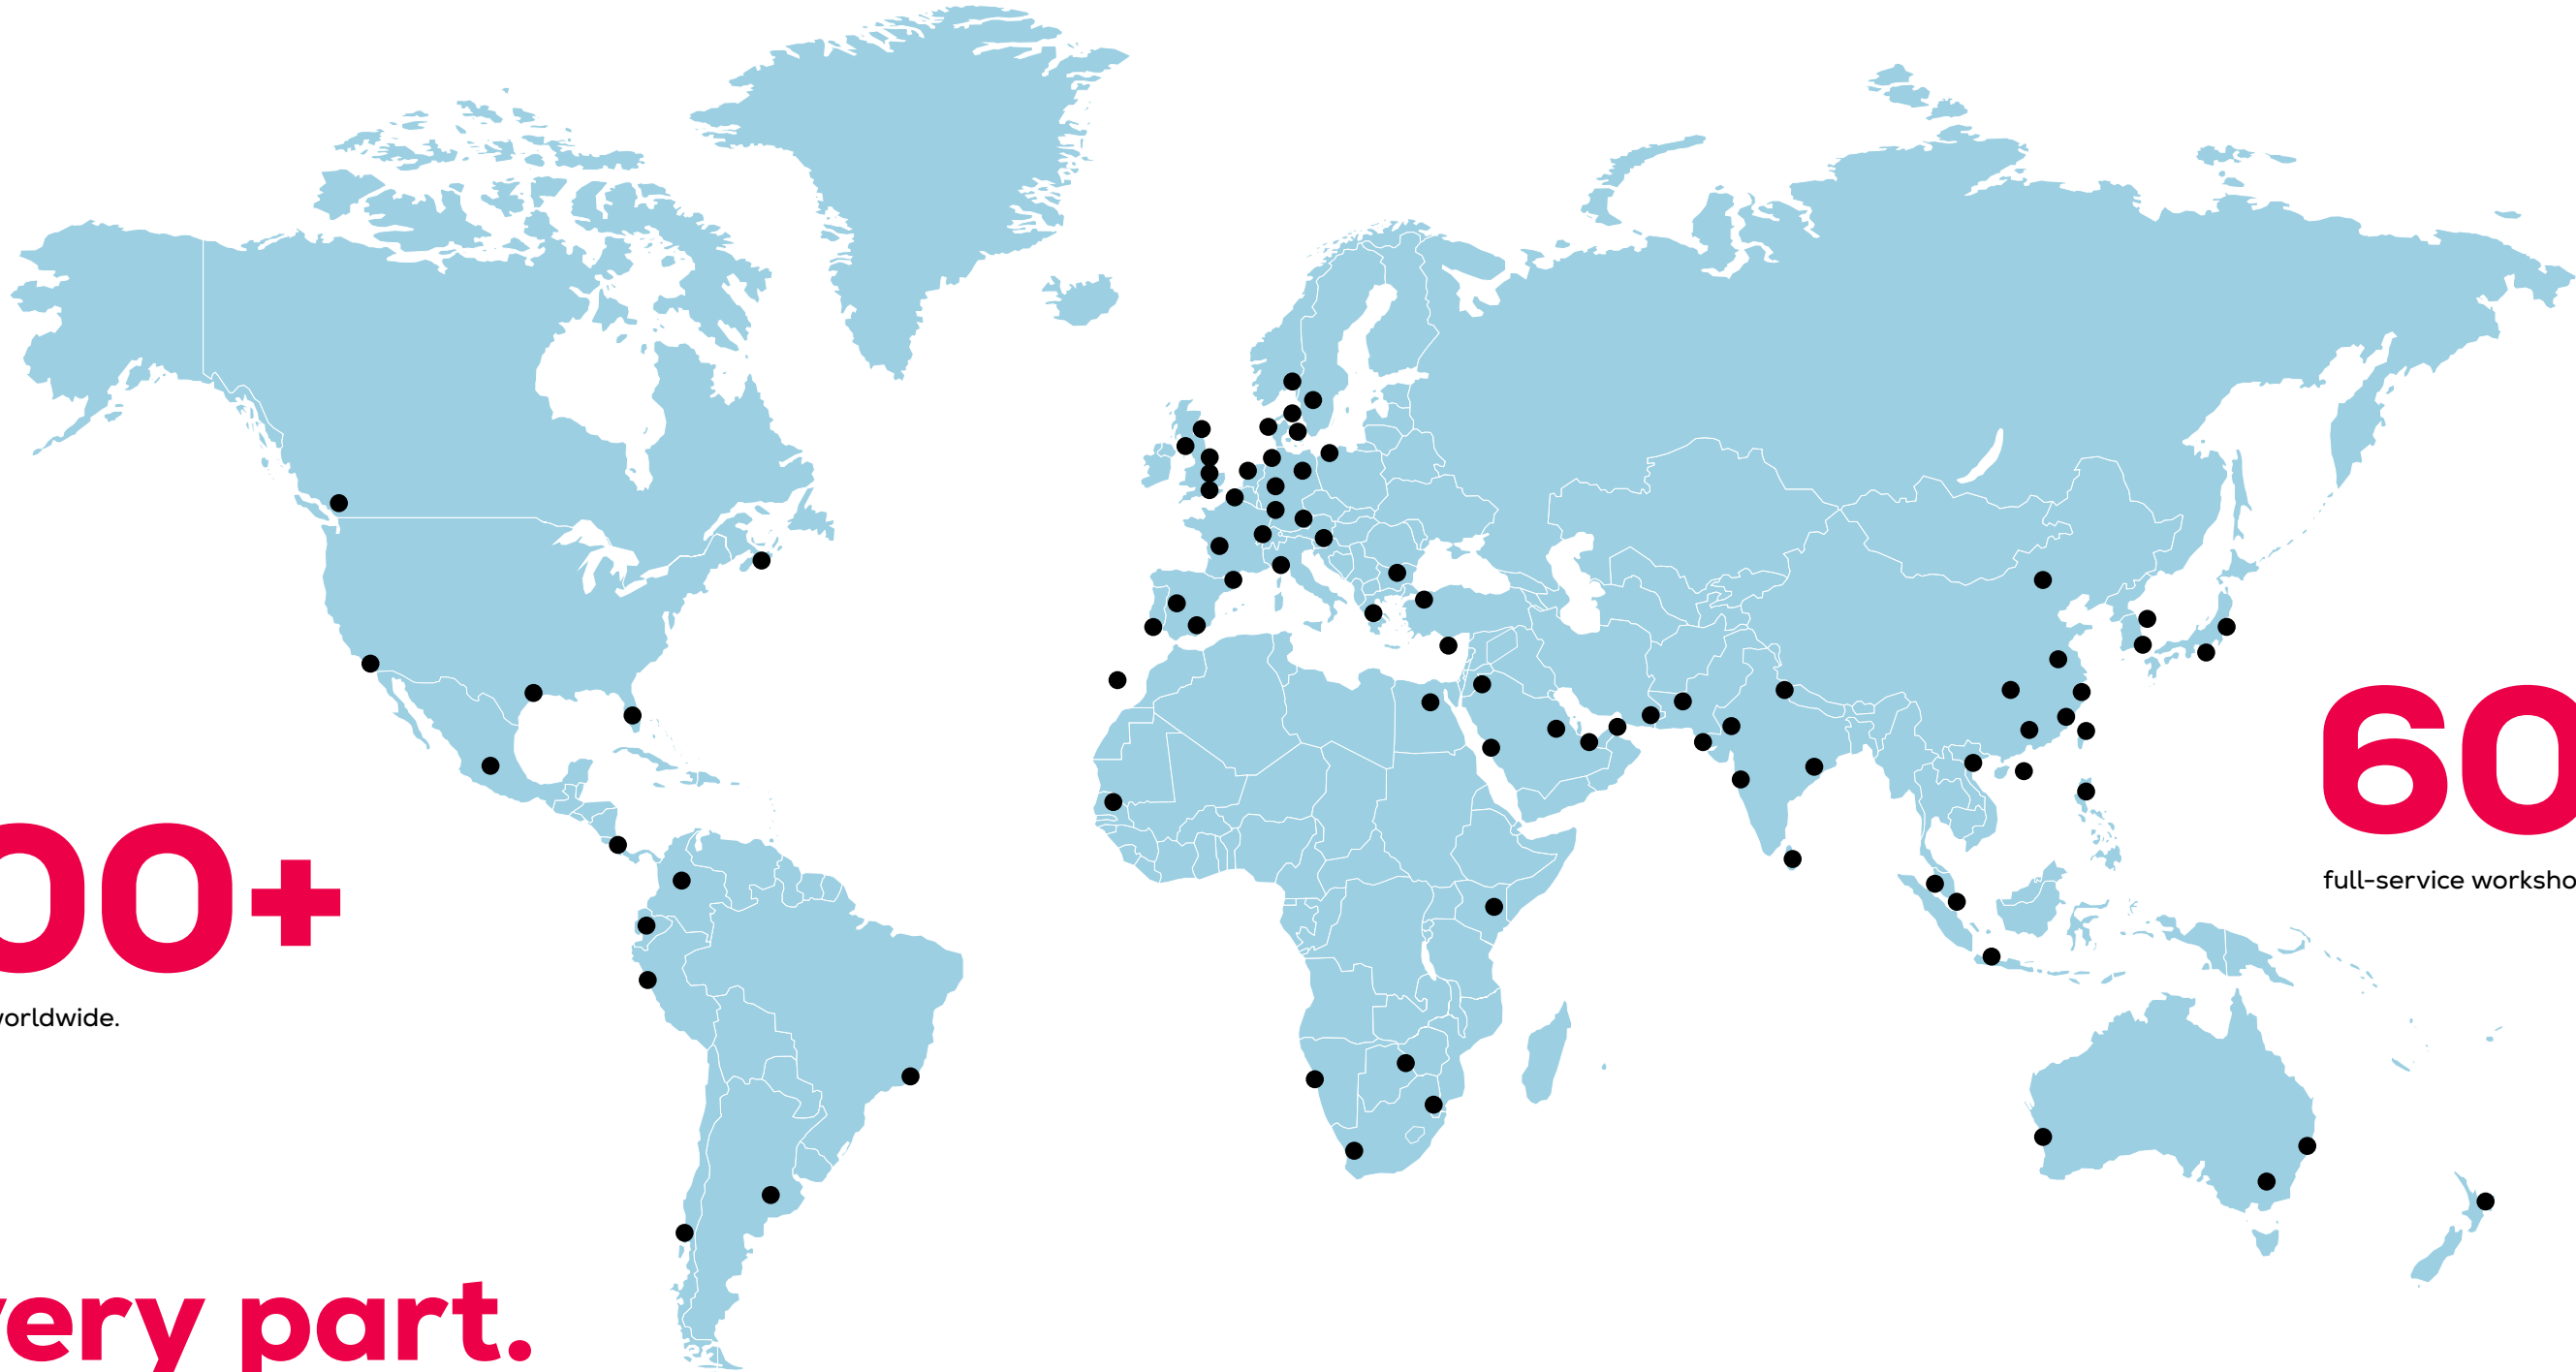

LTSA (Long-term service agreement)
Safeguard your asset with a maintenance contract from the start

PrimeServ Academy: for safe, efficient operation by a trained crew

Digitalize your Everllence asset for maximum efficiency

Original spare parts with full warranty – available as maintenance kits or in our online shop MyPlace

100+

locations worldwide.

Every part. Every upgrade. Everywhere.

Did you remember to order spare parts? No problem – we did. We also checked lube oil, engine condition, scheduled regular maintenance, and installed updates. As your service partners, we keep your business running smoothly, securing efficiency and safety 24/7, around the world, on-site and online.

60+

full-service workshops.

Service has evolved. So have your needs

Everlence PrimeServ doesn't just help maintain your assets. It helps future-proof them.

As you move toward carbon-neutral operations, our digital service solutions ensure your technology performs as promised. Benefit from expert-driven support, real-time monitoring, and advanced analytics that keep your equipment running at peak efficiency – without interruption, year after year.

Because service isn't just about fixing problems. It's also about preventing them.

We want to be your trusted partner

When your work powers ships, cities, and entire industries, there's no room for guesswork. People count on you – and that means you need technology and service you can count on, too.

Everllence brings the experience, systems, and support to help you perform under pressure, meet rising demands, and keep critical operations running strong – every day, everywhere.

Marine

Efficiency. Compliance. Lower cost of ownership.

That's what today's marine operations demand – and with Everllence your fleet is covered.

With decades of expertise, we bring complete system solutions built around your goals. From dual fuel engines and gas supply to propulsion, exhaust after-treatment, and hybrid battery technology, everything works together to raise performance and reduce emissions.

Energy

Reliable power and flexible solutions.

In a shifting energy landscape, reliability and adaptability are everything. That's why utility companies around the world turn to Everllence for power generation systems that balance cost, performance, and sustainability.

With extensive experience in energy infrastructure, we help you meet rising demands while staying in control of long-term costs without sacrificing durability or environmental responsibility.

Industry

Experience that performs under pressure.

From oil and gas to paper, steel, and chemicals, industrial operators rely on Everllence for technology that delivers day after day, year after year.

Our proven portfolio includes compressors, steam turbines, and chemical reactors backed by ongoing innovation and hands-on service. Whether you need spare parts, field support, or smarter upgrades, your toughest industrial challenges are met with forward-thinking solutions backed by decades of experience.

Let's explore new horizons

Where can we go together?

If it moves ships, it can move anything. The same engineering that powers fleets can power turbines. The same insight that keeps engines running can keep renewable systems optimized.

Great service isn't tied to one industry. It's built on understanding performance, pressure, and progress. And those challenges exist everywhere.

So, whether it's propulsion or power generation, industrial machinery or renewable infrastructure, we're ready to bring our skills to new frontiers. With OEM expertise, global reach, and a mindset that's always engineered for your reality – now and in the future.
