

# CENTA Power Transmission

Everllence and Rexnord | CENTA, two companies with a long and trusted history of serving the marine and power industry, are joining forces to give you better access to the market's leading coupling solutions. As an authorized service provider for the CENTA™ product line, and forming part of our Omnicare service, Everllence PrimeServ has enhanced its offering, competencies, and network to ensure you always receive the highest standards of service and value.

## CENTA™

Rexnord | CENTA offers a full selection of couplings, designed for your specific speed, torque and power needs. Available in a variety of materials and configurations, CENTA couplings accommodate many different applications and industries. Size, geometry and material characteristics are relevant for the transmission of torque. Due to different operating conditions and the resulting stress, signs of use in variations will inevitably show on the elements during operation.

## One-stop service solution

Our Omnicare service gives you first-class service and maintenance for your vessels and power plants, no matter the equipment brand.

For over a century, Everllence PrimeServ has provided the best service solutions and technical support for all Everllence engines and equipment. With our Omnicare service, we now offer you the same level of care for all your hardware, regardless of manufacturer. This enables you to benefit from simpler and more efficient asset management, plus maximum availability for your business.

With us as your partner, you get a one-stop service solution covering the maintenance, repair, and reconditioning of engines and equipment from most major brands. Represented in all key markets and major ports, with a network of more than 100 service centers, you have 24/7 access to skilled field service personnel dedicated to keeping you productive, compliant, and profitable.

### Our services

Everllence PrimeServ supports the following industries with on-site assessments, advice, maintenance solutions, and problem-solving action:

#### Marine

Vessel engines and turbochargers of all types and sizes from any manufacturer, including auxiliary equipment.

#### Power

Powerplants and industrial processing plants of any type in any location, including balance of plant.

### Areas of expertise

- Development of flexible service solutions tailor-made to your requirements
- Lifecycle support of 4-stroke genset installations on vessels and powerplants
- Maintenance and repair on 2-stroke engine installations
- Service and repair of radial and axial turbochargers
- Retrofits and upgrades of filtration systems
- Coupling inspections and alignment check of the engine arrangement
- Service and repair of compressors
- Workshop capacity for overhaul and repair of engine components
